Preliminary Conditions for hazardous material

1. The bidder (Israeli) and the companies (Israeli) represented by him are to have all the necessary permits required by law with regard to handling "hazardous material" and engaging in the following activities: storage, transportation, commerce and marketing, including:
 - Business Licensing Act, 1968, and its derived regulations.
 - Hazardous Materials Handling Act, 1993, and its derived regulations.
 - Transportation Services Act, 1997, and its derived regulations.
2. for purposes of transport, the bidder or its behalf must hold a business license for general transport according to Item 10.10D of the Business Licensing Order, 1968, in relation to the location at which the primary activity of the bidder is conducted or, according to the bidder's declaration, pursuant to the position of the relevant local authority, the bidder or its behalf, is not required to hold a business license according to Item 10.10D of the Business Licensing Order, 1968.

Alternatively, the bidder commits that, if he awarded the Tender, he will join by a contract with a transporter that meets all requirements of the law, including the requirements of the Business Licensing Order, 1968.

For the purpose of proving the fulfillment by the bidder or its behalf of this condition, the bidder must enclose to its proposal a copy of a business license that is valid at the deadline for submission of proposals or, alternatively, if the business does not require a license pursuant to the aforesaid item, the Offeror must enclose to its proposal a declaration according to the format enclosed as Appendix 4 of this document.

3. The bidder (Israeli) is to enclose to his bid copies of the hazardous materials handling permit (including a list of materials - permit's first appendix), Business license, and the transporting license; for his own business as well as the companies that he represents in his bid, each in his own field.
4. The Israeli bidder is to sign a "Bidder declaration on hazardous materials handling permit for tenders" attached as Appendix 1 of the contractual conditions document.
5. The bidder is to enclose to his bid a declaration by the manufacturer (if non Israeli), regarding environmental and occupational health protection (Appendix 2). Alternatively, the bidder shall enclose a certificate attesting the fact that the manufacturer maintains an environmental management system according to international standard, such as ISO 14001. The certificate must be valid for the tender requirements and time, and signed by The International Accreditation Forum Multilateral Recognition Arrangements IAFMLA body member.

In the case that the bidder intends to employ an Israeli subcontractors as aforesaid in item 2 and under the following contract conditions, he is required to attach to his bid all the documents that testify that the subcontractor, each in his field, has met the above mentioned prerequisites.
